

About the gallery

We started working as an art gallery on 18th June 2001.

After ten years of experience working with artists, framing and selling their works, listening to their concerns, we finally decided to open a space that would be committed and dynamic, where full attention would be paid to new trends.

The gallery is focussed in the search and promotion of gifted young people involved in the most modern and contemporary kind of art, paying special attention to those living and working in Asturias and often providing their first opportunity to show their creations in the commercial art network. Our aim is also to make known artists living all over Spain and even abroad.

Since our opening, a great number of events related to art have been organized by the gallery:

Twelve exhibitions are held through the year, each one lasting around thirty days.

We took part in the First White Night organised by the Principality of Asturias and, since the very beginning, we have also developed some events parallel to the official schedule of Gijón International Film Festival.

We have often collaborated with some of the most remarkable events of Gijón's cultural life, such as 'Semana Negra' or 'Optica Festival'.

Promotion of our artists, both inside and outside our borders, has become our top priority ever since El Arte de lo Imposible was inaugurated.
